Meals and Their Revenue (USD)

| Meal	Revenue
Spaghetti	55.5
Grilled Chicken	51
Caesar Salad	28
Veggie Burger	22
Pancakes	16.5
Oatmeal	7

Upliance AI Wins Hearts in Cooking, but Session Cooking Scores Higher in Food Ratings!

Dish Name	Session Rating(Avg)	Rating After Cooking(Avg)
Grilled Chicken	4.78	4.67
Spaghetti	4.63	4.5
Pancakes	4.40	4
Caesar Salad	4.37	4
Veggie Burger	4.35	4
Oatmeal	4.10	4

UserID	Total Amount Spend(USD)	Total Order Placed
U001	38	3
U002	31	3
U003	32	3
U004	21.5	2
U005	22.5	2
U006	13	1
U007	14	1
U008	11	1

Duration(mins) vs Session Rating
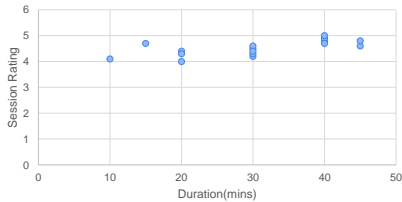

Longer Duration Yields Higher Ratings, Yet More Data Needed to Fully Understand the Connection

Why Were Orders Canceled? Was It Due to Boring Food Methods or Lack of Ingredients?

Need to know why so that we can make further decision on that so that in the future we don't get to see such order status.

In the app, we can add a dineout feature like Swiggy has it. Where we can put food recipes for the festival or what if guests come to our house and want to cook a quick meal for the people based on the themes? Now as Christmas is approaching we can add food recipes where we can cook food during Christmas or what if people want to cook food for their potluck or want to cook food for a date.
